Disabling Wireless on a Belkin Router

Step 1:
Open a web browser and type in this address: http://192.168.2.1 (Fig. 1).

Step 2:
Click Login in the upper right-hand corner of the page (Fig. 2). The router does not ship with a password, so click Submit.

The wireless disable function can be found in one of two places depending on your router.

Option 1:
1. Click Wireless found in the left-hand menu (Fig. 3).
2. You will see Enable or Disable wireless Functionality. Select Disable. (Fig. 4).
Disabling Wireless on a Belkin Router (continued)

Option 2:

1. Select **Channel and SSID** located in the left-hand menu. (Fig. 5).

2. Change the wireless mode to **off**. (Fig. 6).

3. Click **Apply Changes**.

4. The router will reboot, and after the countdown is complete, your changes will be saved.

You have now turned off the wireless function on your router.
