This user’s applies to the following system and telephone models:

**System Models:**
- DXP systems with software 12A and later.
- DXP Plus systems with software 12A and later.
- FX Series with software 12A and later.

**Telephone Models:**
- Impact SCS 8324S-** Rev. A and later.
- Impact SCS 8324F-** Rev. A and later.

If you need more information, consult GCA70–250, *LCD Speakerphone Reference Manual.*
Contact your Comdial dealer for updates of this as well as other Comdial publications.

Comdial® strives to design the features in our communications systems to be fully interactive with one another. However, this is not always possible, as the combinations of accessories and features are too varied and extensive to insure total feature compatibility. Accordingly, some features identified in this publication will not operate if some other feature is activated.

Comdial® disclaims all liability relating to feature non-compatibility or associated in any way with problems which may be encountered by incompatible features. Notwithstanding anything contained in this publication to the contrary, Comdial® makes no representation herein as to the compatibility of features.

Introducing The Telephone

Congratulations and thank you for using a Comdial telephone! This manual serves as a helpful guide for using your new telephone’s many functions. If you should need more information about a particular function or on a function not listed in this guide, consult the LCD Speakerphone Reference Manual, GCA70–250 (your system attendant should have several copies).

1.1 Understanding What The Lights Mean

The lights on your telephone indicate the status of lines, features, and intercom.

— Next to a Direct Station Select (DSS)/Busy Lamp Field (BLF) button:
  • Steady red = station is in use.
  • Flashing red = station is receiving a call.
  • Winking red = message-waiting light set for you by station associated with that DSS button.

— Next to a line button:
  • Steady green = line is in use at your station.
  • Steady red = line is in use at another station.
  • Flashing red = your line is ringing.
  • Flashing orange = your line is ringing and will be answered when you lift the handset.
  • Winking green = line is on hold at your station.
  • Winking red = line is on hold at another station.
  • Fluttering orange = line has recalled from hold at your station.
  • Fluttering red = line has recalled from hold at another station.
Next to a fixed feature or programmable feature button:
  - Steady red = the feature is on.
  - Steady off = the feature is off.

Next to an INTERCOM button:
  - Steady green with a quick flash = you are using your intercom.
  - Winking red = an LCD message is set on your telephone for others to receive when calling.
  - Flashing orange = another station is calling you.

Above the HOLD button:
  - Fluttering red = message awaits pick up.
  - Winking green = a line is on hold at your station.

Above the SPEAKER button:
  - On steady (with telephone on hook and busy) = speakerphone mode is active.
  - On steady (with telephone on hook and idle) = background music is active.
  - Flashing = feature viewing and programming is in progress.

Above the MUTE button:
  - On steady = called party cannot hear your conversation.

Above the SHIFT button:
  - On steady = shift mode is activated to allow access to second level speed dial numbers programmed at DSS button locations.
1.2 Using The LCD Abbreviations

The following chart identifies the abbreviations on your LCD screen and provides a brief definition of each feature.

<table>
<thead>
<tr>
<th>Abbreviation</th>
<th>Feature</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT</td>
<td>Account</td>
<td>Stores a button that enables account code entry.</td>
</tr>
<tr>
<td>ALERT</td>
<td>Set Reminder</td>
<td>Sets two reminder alerts that will sound at your station at specified times.</td>
</tr>
<tr>
<td>ALL</td>
<td>All Calls Forward</td>
<td>Routes all of your calls to a different station location.</td>
</tr>
<tr>
<td>ANS</td>
<td>Answer</td>
<td>Answers a call ringing at your station.</td>
</tr>
<tr>
<td>APAGE*</td>
<td>Auxiliary Pager</td>
<td>Stores a button that selects auxiliary paging speaker operation through the auxiliary jack.</td>
</tr>
<tr>
<td>ARECD*</td>
<td>Auxiliary Recorder</td>
<td>Stores a button that selects auxiliary recorder operation through the auxiliary jack.</td>
</tr>
<tr>
<td>ARING*</td>
<td>Auxiliary Ringer</td>
<td>Stores a button that selects auxiliary ringer operation through the auxiliary jack.</td>
</tr>
<tr>
<td>ARDL</td>
<td>Automatic Redial</td>
<td>Redials a busy call once a minute for 10 minutes.</td>
</tr>
<tr>
<td>BKSP</td>
<td>Backspace</td>
<td>While programming a speed dial number, backspace erases an incorrect entry.</td>
</tr>
<tr>
<td>CALL</td>
<td>Call</td>
<td>Calls a station that turned on your message waiting light.</td>
</tr>
<tr>
<td>CFWD</td>
<td>Call Forward</td>
<td>Forward all of your calls to a different station location. When chosen as a feature, stores a button that enables the function.</td>
</tr>

<tr>
<td>HAVE HOLD</td>
<td>Ask Caller To Hold</td>
<td>Send a non-verbal response to a SOHVA caller so he or she will know to place the outside caller on hold.</td>
</tr>
<tr>
<td>LIGHT</td>
<td>Light (contrast)</td>
<td>Makes the LCD screen lighter.</td>
</tr>
<tr>
<td>MSG</td>
<td>Message</td>
<td>Turns on message-waiting light at another station.</td>
</tr>
<tr>
<td>MUSIC</td>
<td>Background Music</td>
<td>Turns on the background music at your station. When chosen as a feature, stores a button that enables the function.</td>
</tr>
<tr>
<td>NEXT</td>
<td>Next Display</td>
<td>Shows the next display.</td>
</tr>
<tr>
<td>NoANS</td>
<td>No Answer / Forward</td>
<td>Forwards calls that ring at your station but receive no answer.</td>
</tr>
<tr>
<td>OPTIONS</td>
<td>Options</td>
<td>Selects interactive button features.</td>
</tr>
<tr>
<td>OVER</td>
<td>Override</td>
<td>Overrides either a do-not-disturb condition or a busy condition at a station you have called.</td>
</tr>
<tr>
<td>PAGE</td>
<td>Paging Zone</td>
<td>When chosen as a feature, stores a button that provides one-button access to paging.</td>
</tr>
<tr>
<td>PARK</td>
<td>Park Orbit</td>
<td>When chosen as a feature, stores a button that one-button parking of calls.</td>
</tr>
<tr>
<td>PCKUP</td>
<td>Pickup</td>
<td>When chosen as a feature, stores a button that releases privacy for a current call.</td>
</tr>
<tr>
<td>PERS</td>
<td>Personal</td>
<td>Routes your personal intercom calls to a different station location.</td>
</tr>
<tr>
<td>Abbreviation</td>
<td>Feature</td>
<td>Definition</td>
</tr>
<tr>
<td>--------------</td>
<td>----------------------</td>
<td>---------------------------------------------------------------------------</td>
</tr>
<tr>
<td>PRIV</td>
<td>Privacy</td>
<td>When chosen as a feature, stores a button that releases privacy for a current call.</td>
</tr>
<tr>
<td>QUERY</td>
<td>Button Query</td>
<td>Displays program status of any button.</td>
</tr>
<tr>
<td>RECON</td>
<td>Reconnect</td>
<td>Reconnects you to a transferred call.</td>
</tr>
<tr>
<td>RING</td>
<td>Ring Tone</td>
<td>Select different ringing tones.</td>
</tr>
<tr>
<td>SAVE</td>
<td>Save Number</td>
<td>Permanently saves last number you dialed. When chosen as a feature, stores a button that provides the function.</td>
</tr>
<tr>
<td>SDIAL</td>
<td>Speed Dial</td>
<td>Programs a number for one-button calling.</td>
</tr>
<tr>
<td>SEND</td>
<td>Send Transfer</td>
<td>Re-transfers a previously transferred call that returned to your station.</td>
</tr>
<tr>
<td>SET</td>
<td>Set Feature</td>
<td>Enable call forwarding.</td>
</tr>
<tr>
<td>SOHVA</td>
<td>Subdued Off-Hook</td>
<td>Sends a subdued off-hook voice announcement to another station.</td>
</tr>
<tr>
<td>SRC</td>
<td>Music Source</td>
<td>Selects which music source will supply background music.</td>
</tr>
<tr>
<td>TAKE MSG</td>
<td>Take A Message</td>
<td>Send a non-verbal response to a SOHVA caller so her or she will know to take a message from an outside party.</td>
</tr>
</tbody>
</table>

*Available only on 8024S-**.*
1.3 Using Your Speakerphone

When using your speakerphone, the microphone and loudspeaker are farther away from you than when you use a handset. Both the signal from the loudspeaker and the signal to the microphone must be strengthened. When microphones and loudspeakers are close together (such as in a speakerphone), additional amplification typically generates a ringing sound (public address systems do this if the volume is too high or the microphone is too close to a loudspeaker).

NOTE: The 8324F-** speakerphone can function in the full-duplex or half-duplex mode. Both sets of guidelines (section 1.3.1 and section 1.3.2) are applicable to the 8324F-**. The 8012S-**, 8024S-**, 8324S-**, and 8312S-** speakerphones only function in the half-duplex mode—only section 1.3.2, Speakerphone User Guidelines, apply to these telephones.

1.3.1 Using A Full-Duplex Speakerphone

The Impact SCS 8324F-** speakerphone uses the latest full-duplex speakerphone technology. (Full-duplex technology enables both parties on a speakerphone call to speak simultaneously—half duplex speakerphones allow only one person to speak at a time.) The 8324F-** will operate in either full-duplex or half-duplex mode depending on the current line conditions. For example, satellite calls or calls with a delay involved may prevent the telephone from operating in full-duplex mode.

At the beginning of each call, the telephone must perform a “speech training” test. To achieve optimum performance from the full-duplex speakerphone, Comdial recommends that each user in turn speak about 10 consecutive words to allow the telephone to “train” itself. Note that during the “speech training” test, the speakerphone is operating in half-duplex mode.

Depending on the telephone line conditions and the type of speakerphone at the other end, it may not be possible for the 8324F-** to operate in full-duplex mode. If the speakerphone at the other end is a half-duplex speakerphone and both parties are in speakerphone mode, the half-duplex speakerphone is the controlling factor, preventing the 8324F-** from operating in full-duplex mode.

NOTE: Pressing any button (mute, hold, etc.) on the speakerphone while in full-duplex mode causes the system to perform the “speech training” test again. For example, if you press MUTE while in full-duplex mode, when you release the call from mute, the system will perform the entire “speech training” test again.
1.3.2 Speakerphone User Guidelines

NOTE: The speakerphone user guidelines in this section do not apply to the Impact SCS 8324F-** when it is operating in full-duplex mode. However, when the 8324F-** is in half-duplex mode or in “speech training” mode, the following guideline are applicable.

- Both parties cannot talk at the same time. You must wait for silence out of your loudspeaker before talking. You must stop talking to hear the other party.

- Background noise may prevent the sound-activated switches from operating properly. Avoid placing the speakerphone where it will detect sounds from typewriters, keyboards, printers, paging systems, and other equipment.

- Speak slightly louder than normal and with a clear, authoritative voice. For the microphone to best detect your voice, speak within three feet of it and face the telephone.

- Raising the volume of the loudspeaker makes it easier for the sound-activated switches in your telephone to select the distant party’s voice. Lowering the volume of the loudspeaker makes it easier for the switches to select your voice.

- Since the system takes several seconds to provide the best switching, constant sound patterns—such as elongating your words and playing externally-supplied music—may prevent the sound-activated switches from operating properly.

- Place the telephone on a hard surface and away from table edges. Do not place the telephone in corners or enclosures. Do not let obstructions come between you and the microphone. Rooms with hard, flat surfaces that reflect sound may affect the sound-activated switches.

- If you are using a handset and the other party is using a speakerphone, avoid breathing heavily into your microphone. Avoid other sounds that may affect the distant telephone’s sound-activated switches.

- In some situations, such as when either you or the distant party are in a noisy environment, you may have to lift your handset to ensure a clear conversation.

- When both you and the distant party use speakerphones, the sound-activated switches can occasionally detect both voices simultaneously, thus blocking out both voices.
• To manually place a call using your speakerphone,
  1. Press the INTERCOM or line button.
  2. Dial the number.
  3. When party answers, speak toward the telephone.

• To automatically dial a number using your speakerphone,
  1. Press the preprogrammed speed dial or DSS button and speak toward the telephone when your party answers.

• To answer a call with your speakerphone,
  1. Press the INTERCOM or line button with flashing red or orange light.
  2. Speak toward the telephone to answer the call.
  3. To end a call with your speakerphone, just press SPEAKER.
Introducing The Telephone

1 – 10 LCD Speakerphone Station User’s Guide
*NOTE: These are default button locations. Your system installer may have reprogrammed these buttons to better suit your application.
1.4 Adjusting The Telephone Pedestal
(models 8312S, 8324S, and 8324F only)

Your telephone has an adjustable pedestal to allow you to select the most comfortable viewing angle. When you receive the telephone, the pedestal is in its lowest position—flush against the pedestal.

- To adjust the pedestal,
  1. Grasp the rear of the pedestal base firmly with one hand while lifting the rear portion of the telephone upward with your other hand.
  2. While pivoting the telephone upward with one hand, pivot the telephone supporting arms upward with your other hand while feeling for the notches under the telephone. Notice there are three sets of notches under the telephone corresponding to the three positions available.
  3. When the telephone is at the desired height, find the closest pair of notches and place the supporting arms in the notches. Press down slightly on the telephone until you feel the supporting arms snap into place.
2 Answering Calls

NOTE: Throughout this book, all references to fixed buttons are printed in upper case bold type, for example “Press the INTERCOM button.”
All references to interactive buttons are printed in upper case bold italic type, for example “Press the OPTIONS button.”

2.1 Answering Calls

- To answer a call ringing at your telephone,
  1. If the light is flashing orange, lift handset,
     —OR—
     if the light is red, press the flashing line button and lift handset.

- To answer a call using the speakerphone,
  1. Press flashing line or INTERCOM button.

- To answer a call that is ringing at any telephone,
  1. Lift handset.
  2. Press INTERCOM and dial *4 plus extension number of ringing telephone.

- To answer a call that is ringing at a particular telephone in your group,
  1. Hear ringing.
  2. Press INTERCOM and dial #4 (ringing station must be programmed in your call pickup group).
  3. Speak toward telephone to answer call. Lift handset if you desire privacy.
To answer a call that is ringing the loud ringer or night transfer station,
1. Hear ringing.
2. Lift handset.
3. Press INTERCOM.
4. Dial 65 through 68 to select ringing zone (1–4) where the bell is located, or dial 69 to answer any ringing zone.

NOTE: This feature is known as Trunk Access From Any Station (TAFAS).

2.2 Answering a Subdued Off-Hook Voice Announcement (SOHVA)

The installer may arrange your telephone to receive a subdued off-hook voice announcement (SOHVA). If so, an intercom caller may mix into your outside call and deliver a message to your telephone receiver for you to hear.

- To respond verbally,
  1. Press and hold REPLY.
  2. Speak into handset.

- To respond non-verbally,
  1. Press MSG.
  2. Press HAVE HOLD, TAKE MSG (Take Message), or CALL BACK depending on which message you want to leave.

NOTE: Announcing station must have LCD speakerphone.

- To block a SOHVA,
  1. Press BLOCK when calling party initiates SOHVA.
2.3 Forwarding Calls

- To forward calls made to your station,
  1. Press OPTIONS.
  2. Press NEXT until the CFWD option appears.
  3. Press CFWD.
  4. Press SET.
  5. Press PERS to forward prime line and intercom calls,
     —OR—
     press ALL to forward all calls,
     —OR—
     press NO ANS to forward calls that ring at your station but receive
     no answer after a preprogrammed number of rings (then press
     PERS to forward your prime line and intercom calls or press ALL
     to forward all calls that ring with no answer at your telephone).

- To forward calls that ring at your station but receive no answer,
  1. Press OPTIONS.
  2. Press NEXT until the CFWD option appears.
  3. Press CFWD.
  4. Press SET.
  5. Press NO ANS.
  6. Press PERS to forward your prime line and intercom calls or press
     ALL to forward all calls that ring with no answer at your telephone
     (your system installer has already programmed how many times
     your telephone will ring before calls are forwarded).
  7. Press SPEAKER to end.
To cancel call forwarding,
1. Press OPTIONS.
2. Press NEXT until the CFWD option appears.
3. Press CFWD.
4. Press CLR to disable call forwarding.
5. Press SPEAKER to end.
3 Making Calls

3.1 Making A Call

- To make a call,
  1. Lift handset or press SPEAKER, select line (unless your telephone selects it for you) or select INTERCOM, and listen for dial tone.
  2. Either dial number, use speed dial feature, use redial feature, or press Direct Station Select (DSS) if making an intercom call.

3.2 Accessing Lines

NOTE: The dial codes shown in this manual are the default dialing codes. Your installer may have reprogrammed the codes to better suit your application.

- To access outside lines using the line group feature,
  1. Press INTERCOM, then dial line group access code:
     - 9 = group 1,
     - 80–89 = groups 2 through 11,
     - 60–64 = groups 12 through 16.
  2. Listen for outside dial tone.
  3. Dial number.
  4. When called party answers, lift handset.
• To queue for a line group if all lines are busy,
  1. Press INTERCOM and dial line group access code (9, 80–89, or 60–64).
  3. Hang up and wait for queuing ring-back.

• To answer queuing ring-back,
  1. Lift handset and hear dial tone for line.

• To cancel queuing before it rings back at your telephone,
  1. Lift handset.
  3. Hang up handset.

• If you must enter an account code when making outside calls,
  1. Select line.
  2. Press INTERCOM and dial * 04 (this places the call on hold),
     —OR—
     press preprogrammed ACCOUNT CODE button (this does not interrupt the call in progress).
  3. Dial your account number, hear outside dial tone, and dial outside number.
  4. When called party answers, lift handset.
3.3 Using Last Number Redial

- To redial the last number that you dialed at your telephone,
  1. Press SPEAKER (or hang up handset) to disconnect current ringing or busy tone.
  2. Dial #.
  3. Listen for ringing or busy tone over the telephone’s speaker. When called party answers, lift handset; if called party is busy, press SPEAKER to disconnect.

- To automatically redial the last dialed number once a minute for 10 minutes,
  1. Press ARDL.
  2. Listen for ringing or busy tone over the speaker.
  3. When called party answers, lift the handset (you must do this to disengage the redial feature).
### 3.3.1 Using The Automatic Redial Feature

If your station has the multiple automatic redial feature enabled, you can place up to 10 numbers in your telephone’s redial queue. Your telephone will redial the numbers one at a time, in the order you placed them in the queue, until (a) the call is answered, (b) you cancel the automatic redial feature for a particular number, or (c) your telephone has dialed the number a preprogrammed number of times (set by your system installer).

- **To use the automatic redial feature to redial a busy or unanswered number,**
  1. While on the call, press *ARDL* or press the **AUTOMATIC REDIAL** button programmed by your installer.
  2. The system repeatedly dials the number until you cancel the feature or the system has dialed the number a preprogrammed number of times (determined by your system installer).
  3. The **AUTOMATIC REDIAL** light flashes between redials and turns on steady during redialing.
  4. When the distant party answers the call, press the *ARDL* button or the **AUTOMATIC REDIAL** button while on the call to cancel automatic redialing,
    —OR—
    if your installer has enabled answer supervision on your line, the system automatically cancels automatic redialing and turns the **AUTOMATIC REDIAL** light off.
  5. If your system installer has enabled the redial multiple numbers feature, you can have up to 10 numbers in your redial queue. To add numbers to your redial queue, repeat step 1 in the above procedure.

- **To scroll through numbers in your redial queue if your telephone is currently idle,**
  1. Press the *ARDL* button or the **AUTOMATIC REDIAL**.
     The display shows the last number dialed.
  2. To remove the number from the redial queue, press **REMOVE**,
    —OR—
    to scroll to the next number in the queue, press **NEXT**,
    —OR—
    to exit from the redial queue, press **EXIT**.
To interrupt the redialing procedure so that you can scroll through numbers in your redial queue,

**NOTE:** You can only do this if the multiple automatic redial numbers feature is enabled and you currently have more than one number in your redial queue.

1. While your telephone is in the process of dialing a number, press the ARDL button or the AUTOMATIC REDIAL button twice. This treats the number as answered, cancels automatic redialing for that number, and puts the number back in the automatic redial queue. The display shows the last number dialed.

2. To remove the number from the redial queue, press REMOVE, —OR—
   to scroll to the next number in the queue, press NEXT, —OR—
   to exit from the redial queue, press EXIT.

To cancel the automatic redial feature,

1. Perform any user activity at the station (go on-hook, press the speaker button, etc.), —OR—
   press # 72 to delete all numbers from the redial queue, —OR—
   press the ARDL or AUTOMATIC REDIAL button while the number you wish to remove from the redial queue is ringing.

**NOTE:** The system allows only ten numbers in the redial queue. In order to add a number to a full redial queue, you must first remove one of the numbers from the queue.
3.4 Using Speed Dial

- To dial a speed dial number from a preprogrammed DSS button,
  1. Press preprogrammed button. If you have programmed the number at the second level of a DSS button, press **SHIFT** before pressing button.
  2. When called party answers, lift handset.

- To dial personal or system speed dial numbers from your keypad,
  1. Dial desired code:
     - 0–9 = personal speed dial number,
     - *000–*999 = system speed dial number,
     - if you are already on a line, press **HOLD**, then dial code.
  2. When called party answers, lift handset.

*NOTE: On some earlier systems, the available system speed dial codes are *100–*299 and *100–*599.*
3.5 Using Dial By Name

The Dial By Name feature provides an index of names for you to search through. When you select a name in the index, the system will automatically dial that person’s extension number.

- To use Dial By Name,
  1. Press OPTIONS to enter the dial by name menu.
  2. From the dial by name menu,
     Press INT button for intercom calling.
     —OR—
     Press EXT for speed dial calling.
  3. Dial digits corresponding to the letters in the name you want to locate (for example, dial 266 for Comdial). There is no limit to the number of digits you can dial.
     1 = QZ  2 = ABC  3 = DEF
     4 = GHI  5 = JKL  6 = MNO
     7 = PRS  8 = TUV  9 = WXY
  4. The display shows the first existing name match to the dialed digits or shows a No Match message if the system can not find a match.
  5. Press NEXT to display the subsequent names in the index until you reach the name you need.
  6. Press DIAL to call the displayed location.
  7. If the display says No Match, press PREV or enter new digits to search for a new name.
3.6 Making A Subdued Off-Hook Voice Announcement (SOHVA)

- To make a SOHVA announcement using the preprogrammed SOHVA button,
  1. Make intercom call and hear busy tone.
  2. Decide whether to interrupt.
  3. If you decide not to interrupt the called party, hang up.
  4. To interrupt, press preprogrammed SOHVA button and hear several quick tone bursts.
  5. Make announcement (busy tone means the called telephone is in speakerphone mode and you cannot make announcement, system programming has denied your SOHVA, or the called party has blocked your SOHVA).
  6. Wait on line for reply (either verbal or LCD reply).

*NOTE: You cannot control how the called party receives the announcement. This depends on whether the party is using a headset and on the programming of his or her station. For example, if the called party has set the station to forward to voice mail or to another station not in the SOHVA group, he or she will not receive your announcement.*
3.7 Making A Paging Announcement

- To send a paging announcement,
  1. Lift handset.
  2. Press INTERCOM, then dial 70–77 for zones 1–8 [in the default mode code 70 (zone 1) provides an all-call function],
     —OR—
     press a preprogrammed PAGE button.
  3. Make announcement.
  4. Remain on line if awaiting a reply (known as a meet-me page),
     —OR—
     hang up handset.

At times other telephone users may page you with instructions to meet them on line. This is known as a meet-me page. You can go to the nearest telephone and dial a code to contact the paging party.

- To reply to a meet-me page,
  1. Lift handset of nearest telephone.
  2. Press INTERCOM.
  3. Dial 78.
  4. Meet paging party on line.
3.8 Camping On At a Busy Station And Waiting For An Answer (Call Waiting)

If the telephone you have called is busy, you can send a call-waiting message to the telephone and wait on the line for an answer (you must be using the handset for this feature to work.)

- To activate call waiting when you hear a busy signal,
  1. Dial ✴6 (called party hears tone).
  2. Wait on line for reply.
  3. Called party can place the current call on hold or disconnect from the call to answer your call-waiting tone, or ignore you call-waiting tone and continue current conversation.

- To cancel call waiting,
  1. Press INTERCOM, then dial #6.
  2. Hang up or press SPEAKER to end.

- To answer a call-waiting tone if you receive one while on a call,
  1. Hear short burst in handset receiver.
  2. You may choose to ignore the call-waiting tone and remain on line with your original caller,
      —OR—
      complete present call and hang up handset (waiting call will begin ringing). Lift handset to answer waiting call.
3.9 **Camping On At An Idle Station And Waiting For An Automatic Callback**

If you call another station and hear ringing but receive no answer, you can press a button that will cause the system to ring your telephone when the user at the called station initiates any telephone activity.

- **To camp on at a station for which you hear ringing but receive no answer,**
  
  1. Press `CALLBK` button.
  2. Callback will occur after the user at the called station initiates any telephone activity.

- **To cancel the camp-on condition at any time,**
  
  1. Press `INTERCOM` button and dial # 6.

*NOTE: If you make a call in the voice announce mode and receive no answer at the called station, the `CALLBK` option is still available to you.*
3.10 Camping On At A Busy Station And Waiting For An Automatic Callback

- **To camp on at any busy station,**
  1. Press *CAMP*.
  2. Your telephone immediately disconnects. When the station you called becomes available, your telephone will ring with five short tone bursts.

- **When you hear five short tone bursts,**
  1. Press *INTERCOM*.
  2. The other telephone will start ringing. If you do not press *INTERCOM* within the time limit set by the installer, you cancel the callback at that time.

- **To cancel the callback before your telephone sounds the tone bursts,**
  1. Press *INTERCOM* and dial # 6.

- **To camp on at a station with a Do Not Disturb condition set,**
  1. Press *CAMP*.
  2. A callback will occur when the user at the called station disables the Do Not Disturb mode.
4 Placing Calls On Hold

4.1 Holding Calls

- To place a call on hold,
  1. Press **HOLD**.
  2. Hang up handset.

- To return to a call that is on hold,
  1. Lift handset and press line button with flashing light,
     —OR—
     press **TAP**.

- To place a call on exclusive hold,
  1. Press **HOLD** twice and hang up handset.

- To retrieve an exclusive hold,
  1. Press line button of held call (button with flashing light),
     —OR—
     press **TAP** (if station does not have line appearance).

- To place a call on hold at another telephone,
  1. While on line, press **INTERCOM** (system places call on hold).
  2. Dial *90, then dial extension number of telephone to receive held call.
  3. Hang up handset.
• To retrieve a held call at another station,
  1. Lift handset.
  2. Press INTERCOM and dial #90.
  3. Dial extension number of station that has the held call,
  4. Answer call.

• To answer a call at the extension receiving held call,
  1. Lift handset.
  2. Press INTERCOM and dial #90.

• To cancel directed call hold and retrieve the call,
  1. Lift handset.
  2. Press INTERCOM, dial *, then dial the extension number of the
     telephone to which you directed the call.
  3. Retrieve the call.

• You can scan your held calls and retrieve a specific one,
  1. Lift handset (if your station does not have prime line or idle line
     preference).
  2. Press HOLD repeatedly to scan held call list.
  3. Press TAP to retrieve desired call.

  Example: If five calls are holding and you wish to retrieve the
  second call you placed on hold, press HOLD three times to scroll
  from held call #5 to call #4, to call #3, and to call #2, then press
  TAP to retrieve call #2.
4.2 Using Call Park

- **To park a call,**
  1. When on a line, press INTERCOM.
  2. Dial *, then dial park orbit access code (91–99 for orbit 1–9). If chosen orbit is busy, dial a different orbit number.
  3. Hang up handset.
  4. Remember the code for later use or make it known to those who need to know it in order to retrieve the call.

*NOTE: If no one retrieves the call within a programmable time limit, it reverts to the parking station as a standard held call. You can place only one call in an orbit at a time.*

- **To retrieve a parked call,**
  1. From any station, press INTERCOM.
  2. Dial #.
  3. Dial park orbit access code (91–99), or press preprogrammed PARK button.
  4. Answer call.
This page remains blank intentionally.
5 Sending And Receiving Non-Verbal Messages

5.1 Using the Messaging Feature

• To turn on the message-waiting light and broken dial tone at an idle telephone,
  1. Press INTERCOM.
  2. Dial * 3.
  3. Dial extension number of the station you want to alert. The message-waiting light of that station will flash.

• You can also turn on the message-waiting light and broken dial tone at another station when that station is busy,
  1. Hear the busy tone and remain on the line.
  2. Press MSG.
  3. Hang up.

• To turn off the message waiting light at a busy or idle station,
  1. Press INTERCOM.
  2. Dial # 3.
  3. Dial extension number of alerted station. The message-waiting light of that station will turn off.
5.2 Using LCD Messaging

NOTE: You can set system-supplied messages to display at any calling LCD speakerphone.

- To turn on LCD messaging,
  1. Press INTERCOM.
  2. Dial *02.
  3. Press # to clear current message if you have one stored.
  4. Dial message code number (01–30).
  5. Press # and then press SPEAKER to end message.
  6. INTERCOM light flashes.

- To turn off LCD messaging and your INTERCOM light,
  1. Press INTERCOM.
  2. Dial #02.
5.3 Sending An LCD Message

- To send an LCD message when you call and receive busy signal or no answer,
  1. While still on the call, press the appropriate fixed RESPONSE MESSAGE button to send a preselected message (Call [your name], for example) to the other telephone,

  —OR—

  1. While still on the call, press the scrolling RESPONSE MESSAGE button to scroll through the system-supplied messages.

  2. Press # when your display shows the message you wish to send (this displays the message at the called telephone).

- To send an LCD message to a caller who has initiated a SOHVA or intercom call from another LCD telephone,
  1. Hear the SOHVA tone or voice announcement in your handset or headset.

  2. Press the appropriate fixed RESPONSE MESSAGE button to send a preselected message (I Will Call Back, for example) to the calling telephone.

  —OR—

  1. While still on the call, press the scrolling RESPONSE MESSAGE button to scroll through the system-supplied messages.

  2. Press # when your display shows the message you wish to send (this displays the message at the calling telephone and terminates the SOHVA call).
This page remains blank intentionally.
6 Transferring Calls

6.1 Transferring Outside Calls

- To announce a call before transferring it,
  1. Answer outside call.
  2. Press TRANSFER/CONFERENCE (this places the call on hold).
  3. Dial station number, or press DSS button for that station.
  4. Upon answer, announce the call.
  5. Hang up the handset (this transfers the call), or if in speakerphone mode, press SPEAKER to disconnect.

- To transfer a call without first announcing it,
  1. Answer outside call.
  2. Press TRANSFER/CONFERENCE (this places the call on hold).
  3. Dial station number.
  4. Hang up handset, or if using speakerphone, press SPEAKER to disconnect. Call will re-ring your telephone if no one answers it within a preprogrammed time.

- If you hear a busy signal or receive no answer,
  1. Press RECON to return the call to your station.
  2. Press SOHVA to tell intercom party that a call awaits.
  3. Press MSG to leave a message-waiting indication at the called station.
• To make a hot transfer,
  1. Answer call.
  2. Press TRANSFER/CONFERENCE (this automatically places the call on hold).
  3. Dial extension number of telephone to receive the transfer or press the DSS button for that extension.
  4. Announce call.
  5. Press TRANSFER/CONFERENCE.
  6. Press SPEAKER to disconnect (if in speakerphone mode) or hang up. The person receiving the transfer has the call.

• To do a quick screened transfer to intercom or tie line,
  1. Answer call.
  2. Dial intercom number for transfer location.
  3. When party at transfer location answers, announce call.
  4. Hang up or press RELEASE button.

• To do a quick unscreened transfer to intercom or tie line,
  1. Answer call.
  2. Dial intercom number for transfer location.
  3. Hang up or press RELEASE button.
7 Conferencing Calls

7.1 Conferencing Stations Together

- To set up a conference call that includes any combination of outside lines and intercom parties,
  1. Make first call.
  2. Press TRANSFER/CONFERENCE (this places the on hold).
  3. Select next line and make next call.
  4. Press TRANSFER/CONFERENCE to establish conference.
  5. Repeat the last three procedures to add up to two more parties for a 5-party conference (including yourself) when using the DXP system.

NOTE: When using a DXP Plus system, you can have up to seven parties (including yourself) on a conference call.

- To retrieve a line from hold and bring that party into the conference,
  1. Press TRANSFER/CONFERENCE.
  2. Press line button.
  3. Press TRANSFER/CONFERENCE.

NOTE: If all conference circuits are busy, you will not be able to add a party to the conference. The message “Conference Full” will appear in your display.
• To continue conversation on remaining line after other outside lines have dropped out of conference,
  1. Press the line button of the remaining party.

• To drop out of a conference call between you and two outside lines (creating an unsupervised conference),
  1. Dial # (lines remain lighted and in use until one or both outside parties disconnect; when only one party drops out of an unsupervised conference, the other party remains on hold until hanging up or reconnecting with you on line).

  NOTE: The installer must program your system to include this feature or it will not operate as described.

• To rejoin an unsupervised conference between two outside lines,
  1. Press TAP.

  NOTE: Conference volume levels depend upon the quality of the external lines.
8

Programming Your Telephone

8.1 Storing DSS Numbers

- To store extension numbers at DSS buttons,
  1. Press OPTIONS.
  2. Press NEXT until DSS option appears,
  3. Press DSS.
  4. Press programmable button to choose storage location.
  5. Dial extension number.
  6. Press next programmable button and dial another extension number.
  7. Repeat previous step until finished then press EXIT.
  8. Press SPEAKER to end.
8.2 Storing Feature Buttons

- To store special-purpose feature buttons,
  1. Press OPTIONS.
  2. Press NEXT until FEAT option appears.
  3. Press FEAT.
  4. Press NEXT until the feature you want is displayed.
  5. Press desired feature button.
  6. Press programmable button to choose storage location.
  7. Press FEAT again to program another feature or EXIT to end.

NOTE: To clear a feature button assignment, repeat this procedure, but press CLEAR before pressing storage location button.

8.3 Storing A Response Message Button

- To store a scrolling RESPONSE MESSAGE button,
  1. Press INTERCOM.
  3. Press programmable button for RESPONSE MESSAGE button location.
  4. Dial 00.
  5. Press # to save programming.
  6. Press SPEAKER to end.
  7. Label button location.

- To store a fixed RESPONSE MESSAGE button,
  1. Press INTERCOM.
  3. Press programmable button for RESPONSE MESSAGE button location.
4. Dial message number (01-30) from list of messages provided by your system attendant or installer.

5. Press # to save programming.

6. Press SPEAKER to end.

7. Label button location.

### 8.4 Programming Speed Dial Numbers

- To store an outside number as a speed dial number,
  - 1. Press OPTIONS.
  - 2. Press NEXT until SDIAL option appears.
  - 3. Press SDIAL to choose speed dial programming.
  - 4. Press programmable button (or 1–0 on keypad) to choose storage location.

**NOTE:** You can store another number at a second level of a programmable button by first pressing SHIFT.

5. Press line button, or dial 01–16 to select line groups 1–16, or dial 00 for system to select line.

6. Dial number you want to store (maximum 16 digits). To store a hookflash in a number sequence, press TAP; press HOLD to store a pause (only if needed).

7. Press SAVE, press next programmable button, and dial another number to store.

8. Repeat previous step until finished, then press EXIT.

9. Press SPEAKER to end.

**NOTE:** When you are programming emergency numbers and making test calls to emergency numbers, the Federal Communications Commission (FCC) requires that you do the following: (1) remain on the line and briefly explain to the dispatcher the reason for the call; (2) always make test calls during the off-peak hours, such as early morning or late evening.
To store an intercom number as a speed dial number,

1. Press INTERCOM.
2. Dial **1.
3. Press the button you want to program.
4. Press INTERCOM,
   —OR—
   press 8 to preselect intercom.
5. Enter the intercom number you want to store (up to 16 digits that can include # and *).
6. Press SPEAKER to end.
7. Repeat procedure for each speed dial number.

*NOTE: You cannot program pauses or hookflashes with intercom speed dial numbers, and the system will not accept **0# or **746* as programming entries.*
8.5 Setting A Reminder Alert

- To set a reminder alert at your telephone,
  1. Press OPTIONS.
  2. Press NEXT until the ALERT option appears.
  3. Press ALERT.
  4. Press 1 or 2 to select available alert designation; if you have already programmed an alert for 1, press 2 to set a second alert condition.
  5. Press ON (press OFF to turn off an alert that you have already set).
  6. Dial reminder time using the numbers on the dial pad [remember to add a zero (0) before single digit times: 01 for one o’clock, 02 for two o’clock, etc.].

  Example: Set reminder time for ten minutes past three o’clock PM. Remember that the system only recognizes military time which is in the 24-hour format. In 24-hour format, hours in a day are represented by 00 (midnight) through 23 (11 o’clock PM) and minutes in an hour are represented by 00 through 59. Therefore, you would dial the example time as 1510.

  7. Set AM or PM.
  8. Press SAVE.
  9. Press SPEAKER to end.

- To respond to an alert after it sounds,
  1. Press CLEAR to turn off the alert,
     —OR—
     press SET to reset the alert for the same time the following day.
This page remains blank intentionally.
9.1 Adjusting The Display Contrast

- To adjust the display contrast,
  1. Press OPTIONS.
  2. Press NEXT until the DISP option appears.
  3. Press DISP.
  4. Your display will read “Contrast Level.”
  5. Press LIGHT or DARK once for each degree of change desired.
  6. Press SPEAKER to end.

9.2 Blocking Voice-Announce Calls

- To block voice-announce calls,
  1. Press OPTIONS.
  2. Press VAB.
  3. Press ON.
  4. Press SPEAKER to end.

- To un-block voice-announce calls,
  1. Press OPTIONS.
  2. Press VAB.
  3. Press OFF.
  4. Press SPEAKER to end.
9.3 Displaying Status Of Busy Lines And Stations (Busy Button Inquiry)

- To identify the station that occupies a busy line,
  1. Press button for busy line.
  2. Read your display for intercom number of station that is busy on line.

- To identify the line that a busy station occupies,
  1. Press DSS button for busy station.
  2. Read your display for the line number of the busy station.

9.4 Displaying Button Functions (Button Query)

- To cause the display to identify the function of each button on your telephone,
  1. Press OPTIONS.
  2. Press NEXT until QUERY appears,
    —OR—
    dial ✪ ✪ 8.
  3. Press the button in question.
  4. Read the displayed information (display will hold for a few seconds before the telephone returns to idle).
9.5 Diverting Incoming Calls To Another Station

Call diverting permits you to send an incoming call to another station that you have previously designated. You can divert an incoming call to the designated station whether you are busy or idle. You must program a CALL FORWARD button (using the instructions in the programming section) on your LCD speakerphone to serve as a call divert button.

- To identify the station to receive diverted calls,
  1. Press INTERCOM.
  2. Dial #55.
  3. Dial extension number of station to receive diverted call.
  4. Press SPEAKER to end.

- To divert calls to the designated station,
  1. Hear ringing or see flashing line status light.
  2. Press CALL FORWARD (system immediately forwards ringing call to station you designated).

9.6 Listening To A Call Over The Telephone Speaker (Group Listening)

- To activate group listening while on a call,
  1. Press the preprogrammed GROUP LISTEN button.

- To cancel group listening,
  1. Press the preprogrammed GROUP LISTEN button again.

NOTE: You should cancel Group Listening before hanging up the handset to end the call.
9.7 Muting Your Telephone

- To mute your telephone,
  1. Press MUTE (MUTE light turns on). You can still hear distant callers, but they cannot hear you.

- To speak to the distant party,
  1. Press MUTE again (MUTE light turns on).

9.8 Setting A Do Not Disturb Condition

- To enable DND,
  1. Press OPTIONS.
  2. Press NEXT until the DND option appears.
  3. Press DND.
  4. Press ON.
  5. Press EXIT.
  6. Press SPEAKER to end.

- To disable the DND condition,
  1. Repeat the above procedure, but press OFF instead of ON.

- To set a Do Not Disturb condition at your telephone when a call rings at your station,
  1. Hear ringing and notice incoming call information in display.
  2. Press DND option. Ringing will stop, caller will hear the Do Not Disturb tone, and your telephone will remain in DND until you disable the feature (described above).
9.9 Overriding A Call Or A Do Not Disturb Condition At Another Telephone (Executive Override)

- To override an in-progress call at another telephone,
  1. Make intercom call and hear a busy signal.
  2. Dial *03 (all parties will hear several tone bursts).

- To override a Do Not Disturb condition at another station,
  1. Press OVER to disable the Do Not Disturb condition at the called station.
  2. Speak your announcement (if in voice-first mode) or hear ring-back tone (if in tone-first mode).

**NOTE:** This action disables DND condition at the other telephone until the user at that station resets DND.
9.10 Setting The Volume Control

The volume control on your telephone is a multipurpose control you can use to set the volume of the ringer, speaker, handset, headset, background music, and the group listening mode. You can press the VOLUME UP or VOLUME DOWN button once for each change in loudness you desire.

You can adjust the loudness of the distant party at any time during a call whether you are listening over the speaker, the headset, the handset, or the group listen mode by pressing the VOLUME UP or VOLUME DOWN button. When the call ends, the system resets the loudness to the default setting.

You can change the default setting for any volume control setting by pressing ** 7 when the loudness is at the desired level. The volume level remains at this setting until you select a new default.

NOTE: Impact SCS 8324S-**, 8324F-**, and 8312S-** telephones support the optional ICVOL-** handset. The ICVOL-** is an amplified handset with its own volume control, making it useful in noisy environments. For ordering information, contact your Comdial dealer.
• There are four ringer loudness levels (plus an off position). Set the level as follows:
   1. While your telephone is on hook and idle, press the VOLUME UP or VOLUME DOWN button once for each change in loudness you desire. The ringer sounds once for each change as an example of the current setting. Your selection becomes the new default setting and will result in your telephone ringing at that level for all future calls (until you change the default by repeating the above procedure).

   **NOTE:** If you set the ringer to the “off” position, your telephone will sound a short ring burst once for each call you receive at your station while the ringer is off.

• There are eight speaker loudness levels. Set the level for the current call as follows:
   1. While on a call and in speakerphone mode, press the VOLUME UP or VOLUME DOWN button once for each change in loudness you desire.

• There are eight background music loudness levels. Set the level as follows:
   1. While background music is on at your station, press the VOLUME UP or VOLUME DOWN button once for each change in loudness you desire. This level will remain set for background music until you change it again, even if you turn off the feature and then reactivate it.

• There are eight group listening loudness levels. Set the level for the current call as follows:
   1. While on a call and in the group listening mode, press the VOLUME UP or VOLUME DOWN button once for each change in loudness you desire.

• There are eight handset loudness levels. Set the level for the current call as follows:
   1. While on a call and in handset mode, press the VOLUME UP or VOLUME DOWN button once for each change in loudness you desire.
• There are eight headset loudness levels. Set the level for the current call as follows:
  1. While on a call and in headset mode, press the VOLUME UP or VOLUME DOWN button once for each change in loudness you desire.

  NOTE: On telephone models 8024S-** and 8012S-** your installer may have turned on the “high handset volume” feature, providing 13 handset/headset volume levels instead of 8.

• To set a permanent group listening, speaker, headset, or handset loudness level for all future calls,
  1. Press INTERCOM.
  2. Activate speaker, headset, handset, or group listen mode that you want to affect.
  3. While in that mode, press the VOLUME UP or VOLUME DOWN button to adjust loudness.
  4. Dial ∗ ∗ 7 or press a preprogrammed SAVE button to hold the loudness at the last setting for all future calls (until you change the default again).
  5. Repeat this procedure in each mode until you have set all default volume levels.
9.11 Setting Your Personal Ringing Tones

- To select one of the ringing tones,
  1. Press OPTIONS.
  2. Press NEXT until the RING option appears.
  3. Press RING.
  4. Press UP or DOWN to choose ring tone in display (a new tone will sound at each up or down press).
  5. Press EXIT to return to main display.
  6. Press SPEAKER to end.

9.12 Using Background Music

- To turn the music on,
  1. Press OPTIONS.
  2. Press MUSIC.
  3. Press SET.
  4. Select SRC 1 or SRC 2 for the music source (the DXP system is equipped to provide music from two sources, but the installer must enable this feature).
  5. Press SPEAKER to end (the SPEAKER light turns on when background music is on).
  6. Adjust music volume with the volume button.

- To turn the music off,
  1. Press OPTIONS.
  2. Press MUSIC.
  3. Press CLR.
  4. Press SPEAKER to end (the SPEAKER light turns off when background music is off).
9.13 Using The IMIST Module

Impact SCS 8324F-**, 8324S-**, and 8312S-** speakerphones equipped with the optional IMIST module can support an IST device (modem, FAX machine, industry-standard telephone, etc.) in addition to the LCD speakerphone. Depending on system programming, the IST device may be used to make outgoing calls and receive incoming calls.

The functionality of the IMIST module depends on the type of system you are using.

On a DXP system, the IMIST module does not have its own extension number and cannot function simultaneously with the speakerphone.

On a DXP Plus system, the IMIST module will function simultaneously with the speakerphone and have its own extension number if your system has revision 5 or later digital station board firmware. If your system has an earlier firmware revision, the telephone and IMIST module can not function simultaneously and the IMIST module will not have its own extension number.

On an FX Series system, the speakerphone and IMIST module can function simultaneously and the IMIST module has its own extension number.

**NOTE:** The IMIST module does not provide voltage to light a message waiting light. Message waiting lights on devices plugged into the IMIST module will not function.

If you have any other questions about IST devices, refer to GCA70–237, Industry-Standard Telephone Station User’s Guide.

**NOTE:** The IMIST module has a separate power supply. The wall transformer is a UL and CSA approved Class 2 device operating from 120 Vac, 60 Hz, 16 watts and provides an output of 24 V ac at 450 mA. For replacement, order Comdial P/N DIU-PTR.
9.14 Using The Caller ID Feature

The Caller ID feature allows you to view incoming call numbers before you answer them. Incoming call numbers flash in the lower half of the LCD. If you answer the call, the number appears in the upper half of the LCD.

The system also stores numbers that ring on your line but receive no answer. The system indicates that it has stored ring-no answer numbers by causing the CID light on your telephone to flash. Pressing the CID button allows you to view the stored numbers one at a time. Pressing the SAVED NUMBER REDIAL button causes the system to dial the displayed number. If the call has been returned by someone else, pressing the * key reveals who returned the call. Everyone sharing your line can scroll through the stored numbers and choose which calls to return.

NOTE: If your system installer has not programmed a SAVED NUMBER REDIAL button, refer to section 9.4, Using The Feature Buttons, for instructions on programming this button.

- To scroll through ring-no answer numbers stored on your system,
  1. If your CID light is flashing, the system has unreturned ring-no answer numbers stored in memory.
  2. To view the list of unreturned ring-no answer number, press the preprogrammed CID button on your telephone. Your LCD will display the calling number, date, and time the call came in. The most recent call appears first in the list.
  3. Press the CID button each time you wish to display the next most recent ring-no answer call to your line.
  4. To dial one of the numbers in the redial queue, press the SAVED NUMBER REDIAL button. The system will automatically dial the number.

Depending on your system programming, when a call is returned it might remain in the ring-no answer queue or the system might delete it from the ring-no answer queue. Your system installer can tell you how the feature is programmed. If the system is programmed to leave a returned number in the redial queue, the display will show a * next to numbers that have been returned.

- To determine who viewed the number and returned the call,
  1. Press *.

10.1 Operating Your Telephone With A DSS/BLF Console

The IB64X, IB48X, and IB24X DSS/BLF consoles have additional buttons and status lights that extend the memory button capability of an adjacent companion telephone. The buttons can be programmed for automatic dialing (speed dial) or direct station selection (DSS) with busy lamp field (BLF) using the instructions provided previously in this guide.

When the installer assigns a DSS/BLF console to a station port, the system recognizes it as such and automatically clears (blanks) the console buttons so that you can store numbers at the buttons as you need them.
10.1.1 Accessing The Button Levels

The IB24X and IB48X DSS/BLF consoles have four levels of buttons, quadrupling the consoles' button capacity. The four buttons at the bottom of each console allow you to select which button level is currently active. To change button levels, press one of the buttons at the bottom of the console. The leftmost button activates level 1, the next button activates level 2, etc. A light beside the appropriate button lights to indicate which level is currently active.
## Troubleshooting Your Telephone

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Possible Cause</th>
</tr>
</thead>
<tbody>
<tr>
<td>INTERCOM light flashing.</td>
<td>Your messaging is set. Press INTERCOM, then dial # 02 and hang up.</td>
</tr>
<tr>
<td>HOLD light flashing with no line on hold.</td>
<td>Another telephone has activated your message waiting light. Press INTERCOM and then press HOLD to retrieve message. This action will call party who activated light. Once you have received message, party who activated light (while still talking to you) must press INTERCOM to turn off the light.</td>
</tr>
<tr>
<td>MUTE light on.</td>
<td>MUTE is activated. To cancel, press MUTE.</td>
</tr>
<tr>
<td>SPEAKER light on steady.</td>
<td>Background music feature activated even though the system does not provide background music. To cancel, press INTERCOM then dial # 1.</td>
</tr>
<tr>
<td>Error Tone (three steady tones)</td>
<td>May occur when incorrect buttons are pressed during speed dial programming. For example, if a button has a line assigned to it, or was not enabled for speed dial programming by the installer.</td>
</tr>
<tr>
<td>You can not receive a voice announce call.</td>
<td>Voice announce block has been activated. To cancel, press INTERCOM then dial # 2.</td>
</tr>

Appendix A
Quick Reference Guide

This chart provides you with a Quick Reference Guide of the feature dialing codes. If you wish, you can detach these pages and keep them near your telephone to serve as a stand alone reference. Chapter 8, *Programming Your Telephone*, describes a method to program these codes on your telephone at unused programmable buttons. Also, the installer may store features at your telephone buttons and label the buttons with the feature’s mnemonics.
